

This is a digital copy of a book that was preserved for generations on library shelves before it was carefully scanned by Google as part of a project to make the world's books discoverable online.

It has survived long enough for the copyright to expire and the book to enter the public domain. A public domain book is one that was never subject to copyright or whose legal copyright term has expired. Whether a book is in the public domain may vary country to country. Public domain books are our gateways to the past, representing a wealth of history, culture and knowledge that's often difficult to discover.

Marks, notations and other marginalia present in the original volume will appear in this file - a reminder of this book's long journey from the publisher to a library and finally to you.

### Usage guidelines

Google is proud to partner with libraries to digitize public domain materials and make them widely accessible. Public domain books belong to the public and we are merely their custodians. Nevertheless, this work is expensive, so in order to keep providing this resource, we have taken steps to prevent abuse by commercial parties, including placing technical restrictions on automated querying.

We also ask that you:

- + *Make non-commercial use of the files* We designed Google Book Search for use by individuals, and we request that you use these files for personal, non-commercial purposes.
- + *Refrain from automated querying* Do not send automated queries of any sort to Google's system: If you are conducting research on machine translation, optical character recognition or other areas where access to a large amount of text is helpful, please contact us. We encourage the use of public domain materials for these purposes and may be able to help.
- + *Maintain attribution* The Google "watermark" you see on each file is essential for informing people about this project and helping them find additional materials through Google Book Search. Please do not remove it.
- + *Keep it legal* Whatever your use, remember that you are responsible for ensuring that what you are doing is legal. Do not assume that just because we believe a book is in the public domain for users in the United States, that the work is also in the public domain for users in other countries. Whether a book is still in copyright varies from country to country, and we can't offer guidance on whether any specific use of any specific book is allowed. Please do not assume that a book's appearance in Google Book Search means it can be used in any manner anywhere in the world. Copyright infringement liability can be quite severe.

## PUBLISHER'S NOTICE.

---

THE former editions of the SCHOLAR'S COMPANION have met with a reception which has furnished unequivocal testimony to its value as a school-book. The work has now been revised, with great care and labor, by a gentleman who has had experience as an instructor, both in English and classical studies. The amount of matter, particularly in the Etymological Part, has been much increased; the definitions, throughout the volume, have been made more accurate and complete; many notes have been inserted; references from one paragraph to another have been made much more numerous; the articles on the *derivation and composition of words* and on *prefixes and suffixes* have been written anew; articles on the pronunciation of the Latin and Greek have been added, and Latin and Greek words, throughout the volume, have received accentual marks; the Greek words have been printed in the Greek character, in addition to the representation of them in English letters; and in general, additions and corrections have been made wherever they seemed to be called for. The publisher is confident that the value of the book has been greatly increased, and he invites to it the attention of teachers and private students.

## PREFACE.

---

THE study of our own language should form a leading department in all our systems of education. Among the various modes in which it may be prosecuted, there are those which are applicable to pupils of every age and every grade of scholarship, as well as those which are adapted to promote almost every kind of mental discipline. It is probable that instructors of children are not generally aware of the variety which it is in their power to give to exercises in the English language, or of the facility with which such exercises might be made to occupy and amuse those young pupils whom they are often at a loss to employ. It is probable also that in our higher institutions of learning, far greater attention will yet be paid to the study of the English language, than that study has heretofore received.

The "Scholar's Companion" is designed for primary schools and academies, and for private reference by those who feel the need of a convenient guide to the correct understanding and use of English words. Of the three Parts into which it is divided, the second is the most important; while the other two are confidently presented to the teacher and the learner, as containing that which will be found in a high degree useful. The insight into the signification of a large portion of the words of our language, which is afforded by an acquaintance with the Latin and Greek, well repays even the labor of acquiring those languages thoroughly. But it will not be denied

that by the use of such exercises as those contained in the second Part of this book, much of the insight above referred to may be communicated to those who are able to read only the English language. The person who can remember that the English word *manual*, (for instance), is derived from the Latin word *mānus*, signifying *the hand*; that *currency* is from *curro*, to run; that *plenary* is from *plenus*, full; that *orthography* is from the Greek words *ὀρθός*, *correct*, and *γράφω*, *to write*, &c., &c., is placed, in respect to a correct understanding of the signification of such words, almost, if not entirely, on a level with one who is master of the Latin and Greek languages. There are, indeed, other classes of words, in which the signification cannot be so fully understood from a mere inspection of the Latin or Greek roots; but so much may be attained as abundantly to reward a careful attention to the exercises in question.

Part II. will also be found useful to those who are engaged in the study of Latin and Greek. It is desirable that such pupils should be accustomed, in recitation, to state what English words are derived from any particular Latin or Greek word occurring in the lesson; and many pupils will be unable to recall the derivatives, without some such aid as is furnished in the etymological part of this volume.

In compiling the tables contained in Part II., a selection was, of course, to be made. To insert, on the one hand, every Latin or Greek word which has any derivative in the English, and on the other, to place in the tables every adverbial and other form which a derivative may assume, would be not only to increase the size and cost of the book without any advantage, but to embarrass the instructor and pupil in the use of it. It is believed, however, that in the following pages, if there has been any error in this respect, it is rather on the side of unneces-

sary fullness, than of improper omission. The principles on which the selection was made may be illustrated by a few examples of words omitted. The English words *large*, *dense*, *pest* are derived from the Latin words *largus*, *densus*, *pestis*; but the knowledge of their derivation is evidently of little or no advantage so far as the understanding of the English words is concerned. Again, the words *hebetude*, *lacteal*, *lubricate*, are of comparatively rare occurrence, and have very few cognate words with which they may be classed; were such cases of derivation inserted, the English word would be as new and strange to most pupils as the Latin or Greek word from which it is derived, and the memory would be taxed with both, while there would be none of that interest which attends the discovery of the derivation and primitive meaning of a word with which we have been familiar. The same remarks are applicable to a great part of the peculiar terms of science. A faithful study of the derivation of the more important words will cultivate a taste for such investigation; and the pupil will at length find himself disposed to trace to its origin every new word which may occur in his reading, and unable to rest satisfied until he has done so. When this taste has been formed, he will of course need one of the larger English dictionaries in which the etymology of every word is given.

A large portion of the words which are given as derived from the Latin, actually came into our language from the French, or from some other of the European languages which are the more immediate offspring of the Latin; but if the affinity between the English and the Latin word is apparent, it will be unimportant, in most cases, to know whether the derivation has been direct or indirect. In cases where the English derivative differs considerably in form from the parent Latin word, the corresponding French word will be found appended, to account for the change.

A principle analogous to the above has guided in the classification of English words as derivatives. The words *preservation* and *servitude*, (for example), are classed together, as derivatives of the Latin word *servo*, to watch or preserve; for although the word *servitude* is derived more immediately from *servio*, to serve, yet as *servio* is itself a derivative of *servo*, the classification adopted is obviously correct, and is that which is best fitted to answer the design of the exercises.

Part III. will be found of great value to those who are studying English composition. Indeed, there are few, even among practiced writers, who do not occasionally feel the need of such a manual.

A few more specific suggestions, designed to guide the instructor in the use of this book, will be found prefixed to the several Parts; but no instructor will be able to use this, or any other school-book to the best advantage, who does not continually exercise his own ingenuity in devising varied methods of instruction, by which to relieve monotony and awaken enthusiasm among his pupils.

## PART I.

### CLASSIFICATION OF WORDS ACCORDING TO ORTHOGRAPHY AND PRONUNCIATION.

*To the Teacher.*—In using Part I, various modes of study and recitation may be employed, and it will usually be found best to pursue no one mode exclusively. But it is earnestly recommended to the teacher to employ a variety of *written*, as well as oral exercises, in the classes which are studying this Part. Let the pupils be required, (for instance,) to form sentences which shall contain the words of the lesson; and let the plan of the composition be simple or more difficult, according to the age and attainments of the class. Written exercises of this kind may be varied to almost any extent, and will be found on many accounts advantageous in the prosecution of such studies.

## CHAPTER III.

**EQUIVOCAL WORDS:** *or words whose different significations have either no connection with each other, or none which can be easily traced.*

*Note.* As the words of our language have been derived from various other languages, it has often happened that two or more words entirely distinct in their origin and signification, have taken the same spelling and pronunciation in English. Thus, from the Saxon word *beorcan*, is derived the English word *bark*, signifying to make the noise of dogs; from the French word *barque*, is derived *bark*, a vessel; and from the Danish word *bark*, is derived *bark*, the covering of a tree. ## CHAPTER V.

### RULE IN ORTHOGRAPHY.

WORDS of one syllable, ending with a single consonant preceded by a single vowel, double that consonant when they take an additional syllable beginning with a vowel. Words of more than one

syllable, ending in the same manner, follow the same rule, when they are accented on the last syllable.

In the following table, the several columns contain specimens of the several classes of words which do, or do not double their final consonant.

BAR,	Bare,	Bait,	Bark,	BEFIT',	Bal'lot.
BARR'D,	Bared,	Baited,	Barking,	BEFITTING,	Balloting.
CHIP,	Chime,	Cheat,	Cart,	COMMIT',	Car'pet.
CHIPPING,	Chiming,	Cheating,	Carting,	COMMITTED,	Carpeted.
DIP,	Dire,	Dear,	Damp,	DEFER',	Di'ffer.
DIPPING,	Direr,	Dearer,	Damper,	DEFERRING,	Differing.

FATTED,	Faded,	Jailer,	Inky,	IMPELLING,	Inhabiting.
IN,	Ice,	Fail,	Find,	FORGET',	Fer'ret.

RAG,	Rage,	Read,	Right,	REFER',	Rob'ber.
RAGGED,	Raging,	Reading,	Righter,	REFERRING,	Robbery.
TAN,	Tune,	Tear,	Tight,	TREPAN',	Tam'per.
TANNER,	Tuner,	Tearing,	Tighter,	TREPANNING,	Tam'pering.
UP,	Use,	Vain,	Urn,	UNSHIP',	Ut'ter.
UPPER,	Using.	Vainer,	Urned,	UNSHIP'PED,	Uttering.

\* Some words which are *not* accented on the last syllable, are often spelled with the double consonant; thus, *leveler* is often spelled *leveller*; *worshiper* is spelled *worshipper*; *jeweler*, *jeweller*, &c. This mode of spelling such words is condemned by Dr. Webster, as contrary to analogy.

When *ed* is added to those words which double the consonant, the *e* may be omitted in writing, and an apostrophe supply its place; but when the consonant is not doubled, the *e* should be written; thus, *robb'd* for *robbed*; but not *rob'd* for *robbed*.

## PART II.

---

### DERIVATION.

**DIRECTIONS FOR USING PART II.** The pupil should study Chapter I., so as to be able to recite it readily, (i. e. to state the substance of each of the preliminary observations, and to give an account of each of the Prefixes and Suffixes, with the examples which illustrate their use,) before proceeding further.

The figures included in parentheses refer to the paragraphs of Chapters II. & III.; and in Chapter I., the references to Latin and Greek words are distinguished by the letters L. and G.

It is desirable that Part II. should be *studied, as a distinct exercise*, before it is used as a reference book. The pupils will thus become accustomed to tracing the etymology of words, and will be prepared to discover, without referring to the book, the derivation and signification of many words, on meeting with them for the first time. Not only should the practice of tracing English words to their Latin or Greek primitives be continued by all pupils who have studied this Part, but those who are studying Latin or Greek should be in the habit of ascertaining, and stating in their recitations, what English words are derived from the Latin or Greek words which occur in their lessons.

### CHAPTER I.

#### GENERAL ACCOUNT OF THE DERIVATION AND COMPOSITION OF ENGLISH WORDS.

1. THE words of the English language may be separated into two principal classes, viz.: *words of Saxon origin*, and *words of Latin origin*. Words derived from the ancient Greek, belong, in this general division, to the latter of the two classes; although they will be arranged by themselves, for the sake of convenience, in the following pages.

*Note.* For an account of such words as are neither of Saxon nor Latin origin, let the student consult Dr. Webster's large Dictionary.

2. A great part of the words which are classed as words of Latin origin, were introduced into the English, not directly from the Latin itself, but from the French, or from some other of those modern languages which sprung from the Latin, and strongly resemble it. For example, the word *finish* may have come into our language from the French word *finir*; but both are to be traced back to the Latin word *finis*, (L. 176), signifying an *end* or *limit*.

3. By learning the derivation of a word, we often obtain a clearer notion of its signification than we could obtain in any other way. This is true of the following examples, viz.: *Contact*, which is from the Latin particle *con*, together, and the verb *tango*, (participle *tactus*), (L. 526), to touch; *Federal*, from *fœdus*, (L. 162), a league, or treaty; *Gradual* from *gradus*, (L. 207), a step; *Induce* from *in*, into, and *duco*, (L. 133), to lead.

4. As Latin and Greek words often vary considerably in form, in their different cases, tenses, &c., and as the English word is not always formed from that case or tense which is considered the foundation of the others, it is often necessary to know more than one of the forms which the Latin or Greek word may assume. Thus, the word *fluent* is derived from the Latin verb *fluo*, (I. 185), to flow; while *influx* is from *fluxum*, the supine of the same verb, and the preposition *in*. So the Latin adjective *felix*, (L. 163), which has in its genitive case *felicis*, gives rise to the English word *felicity*.

5. In arranging English words in *families* under the Latin or Greek words from which they are derived, it is proper to place under the several Latin or Greek words, not only the English words derived *immediately* from them, but also those derived from *their derivatives*. For example, under the Latin word *nascor*, (L. 324), (part. *natus*), to be born, should be classed the English words *nascent*, *natal*, *natural*, *nativity*, and *nation*; although, with the exception of the first, they are derived more immediately from words in the Latin which are derivatives of *nascor*, viz.:—*natalis*, *naturalis*, *nativitas*, and *natio*.

6. Many English words are formed from other English words, by means of *prefixes* and *suffixes*. A letter, syllable, or word joined to the beginning of a word is called a *prefix*; a letter or syllable joined to the end is called a *suffix*. Thus, from *tell* is formed *foretell*, by joining a prefix; and from *do* is formed *doer*, by joining a *suffix*. A word may take two or more prefixes or suffixes at the same time. Thus, *reproduce* contains two prefixes, *re* and *pro*; *wonderfully* contains two suffixes, *ful* and *ly*; *roguishness* two suffixes, *ish* and *ness*.

7. Some of the prefixes and suffixes are of Saxon origin, and others are of Latin origin. Some of them are words which may be used separately, while the greater part are *inseparable*, i. e. are never used by themselves. Many of the prefixes which are inseparable in English, are separable in the languages from which they are derived.

8. In learning our own language, we become so familiar with the signification of most of the prefixes and suffixes, (although it is not always easy to *state* that signification), that as soon as we

have ascertained the meaning of any word which is new to us, we can tell what would be the meaning of the several words formed from it by such additions. Thus, after learning the meaning of the word *confirm*, we know what must be the meaning of the words *confirmed*, *confirmation*, *confirmatory*, *confirmer*, *confirmedly*, *unconfirmed*, &c., from the manner in which they are varied from the word *confirm*. In some cases, the prefixes or suffixes seem not to affect the signification of the word to which they are joined.

9. When a prefix ends with a consonant, that consonant is often changed or omitted, in order that the prefix may unite easily with the word to which it is to be joined. In the words *affix*, *cohere*, (L. 217), *implant*, and *suffix*, (for example), the prefixes *ad*, *con*, *in*, and *sub*, are changed, for the sake of producing a more agreeable sound.

## PREFIXES.

The following is a list of the most important prefixes used in forming English words. The abbreviation (Lat.) shows that the prefix is from the Latin (Gr.) that it is from the Greek. Prefixes which are *inseparable* in the languages from which they are derived, (as above explained, § 7), are denoted by the abbreviation (insep.)

**AD**, (Lat.) which may become, in composition, (§ 9), *a*, *ac*, *af*, *ag*, *al*, *an*, *ap*, *ar*, *as*, or *at*, signifies *to*; as, *adhere*, (L. 217), to stick to; *ascend*, (L. 465), to mount to; *allot*, to assign to; *at-test*, (L. 538), to bear witness to.

## SUFFIXES.

IN the following list of suffixes, examples are given, under each suffix, of the several parts of speech which that suffix is used to form. Thus, under *Ate*, the example preceded by the abbreviation *a.* illustrates the manner in which *ate* is used to form adjectives; the example marked *s.* illustrates its use in forming substantives.

The signification of the suffixes must be learned by observation. In many cases, it is impossible so to state it, that the pupil can use the statement as a general definition, in analyzing words. Should the teacher desire something

like a general definition, the words italicized in the explanations of the examples given in this list, may be used for this purpose, as the sentences are constructed with a view to such a use of the italicized portion. In analyzing words, with reference to their derivation, the pupil should be accustomed to state what part of the word constitutes the suffix,—what part or parts of speech it is used to form—and how it affects the signification of the word in question. A careful study of the examples here adduced and explained will give the pupil facility in expressing the signification of the suffixes in other cases.

## CHAPTER II.

### WORDS DERIVED FROM THE LATIN.

**PRONUNCIATION.** Latin words are usually pronounced in this country, in accordance with the general principles of English pronunciation. The following directions, however, are necessary for those who have not studied Latin, and should be carefully observed.

1. Every Latin word has as many syllables as there are vowels or diphthongs in it. Thus, in the expression *bona fide*, in good faith, the word *fide* has two syllables, the *e* being sounded as *e* in *me*. In like manner the words *voce*, *jure*, *parte*, *lege*, &c. are pronounced each with two syllables.

2. Words of *two* syllables have the accent always on the first syllable; as, *a'cer*, *a'go*, *ar'bor*. In this book the accented syllable is marked, in all Latin words of more than one syllable; and the manner in which the word is divided will generally show what sound is to be given to the vowel of the accented syllable.

3. When a word of more than one syllable ends with *a*, that letter is sounded as *a* in *ah*, except that the sound is not prolonged; as *cau'sa*, *cate'na*.

4. The diphthongs *æ* and *œ* are sounded as simple *e* would be in the same place; thus, *fæ'dus* and *œm'ulus*, are pronounced as if written *fe'dus*, *em'ulus*.

5. *C* and *g* are hard before *a*, *o*, and *u*, and soft before *e*, *i*, and *y*; thus, in the words *ca'no*, *co'lo*, and *cu'ra*, the *c* has the sound of *k*; in *ce'do* and *ci'vis* it has the sound of *s*. So *g*, in the words *fuga'tus*, *li'go*, and *lon'gus*, has the sound of *g* in *give*; in the words *ge'ro* and *gig'no* it has the sound of *g* in *gentle*.

6. *Ch* always sounds like *k*.

For a full account of Latin pronunciation, see Andrews's and Stoddard's Latin Grammar.

¶ In the following chapter, a Latin word placed in a parenthesis immediately after another Latin word, as (*acris*) after *Acer*, shows the form which that word assumes in the *genitive case*, if it be a substantive or adjective; or in the *supine*, or some other inflection, if it be a verb. See § 4, p. 49.

## IV. FRENCH WORDS AND PHRASES.

As French words and phrases are very frequently introduced into English conversation and writing, it is desirable that every person should have some idea of the pronunciation and signification of those, at least, which are most common. The following account of some of the French sounds will perhaps be sufficient for the purposes of this chapter.

a,	short,	sounds like	a	in the English word	<i>fat</i> .
â,	long,	"	a	"	<i>arm</i> .
e,	at the end of monosyllables,	sounds like	u	in	<i>tub</i> ; and is mute at the end of other words.
é,	sounds like	a	in	<i>able</i> .	
è,	"	e	in	<i>met</i> .	
ê,	"	e	in	<i>there</i> .	
i,	short,	"	i	in	<i>idiot</i> .
î,	long,	"	ee	in	<i>eel</i> .
o,	short,	"	o	in	<i>ornithology</i> .
ô,	long,	"	o	in	<i>old</i> .
u				no similar sound in English.*	
ou,	sounds like,	oo	in	<i>cool</i> .	
an,	"	an	in	<i>want</i> .	
in,	"	an	in	<i>pang</i> .	
on,	"	on	in	<i>long</i> .	
eur,	"	ur	in	<i>fur</i> .	
oi,	"	wa	in	<i>water</i> .	
oir,	"	war	in	<i>warfare</i> .	
oin,	"	oo	in	<i>cool</i> , and an in	<i>pang</i> .
ail,	"	a	in	<i>fat</i> , and lli in	<i>billiard</i> .
eil,	"	e	in	<i>there</i> , and lli in	<i>billiard</i> .
euil	"	u	in	<i>tub</i> , and lli in	<i>billiard</i> .
gn,	"	ni	in	<i>union</i> .	
j,	"	s	in	<i>pleasure</i> .	
ch,	"	sh	in	<i>shark</i> .	

\* Although the sound of the French *u* cannot be represented by English letters, the following rule will enable the pupil to form some idea of it. Place your lips as if about to pronounce *ou* as in *soup*, and bring the extremity of your tongue against your lower teeth. With your organs in this position, you will be likely to produce the sound of the French *u*.

## FRENCH WORDS.

N. B. In the following list of words and phrases, the representation of the French sound, which is given in parenthesis, is figured in accordance with the above table of sounds. The accents are only *marks indicating sound*, according to the above table. When the letter *n* is italicized in the parenthesis, it is to have the English sound of *n*, and not the French nasal sound.

## PART III.

## ENGLISH SYNONYMS.

WORDS which are strictly *synonymous*, i. e., which are used to convey precisely the same idea, and might be substituted for each other in any possible connection, are almost, if not entirely unknown. But the term *synonymous* is applied, in common usage, to words which represent a given idea under different limitations or modifications, while the words belong to the same part of speech. As the degree of resemblance between the signification of such words may vary indefinitely, a larger or smaller number of words would, on different occasions, be classed together as synonyms, according to the different purposes for which the classification should be made.

In attempting to express ideas, either orally or in writing, it is often difficult to recall the word which most nearly meets the case. Young writers, especially, are much embarrassed in this way; and without some aid, they will not rapidly improve in pertinency and variety of expression. It is the object of the following collection of synonyms to furnish the aid which the difficulty above mentioned renders necessary.\* When the student is in doubt respecting the distinction between the significations of words here classed together, he will of course resort, either to a large English dictionary, or to a proper dictionary of synonyms, like that of Crabbe. In consulting the following pages, he may not only have the appropriate word suggested, when the memory alone is at fault, but may become acquainted with new words, and be led to investigate their meaning.

In arranging the words in paragraphs in this Part, the aim has been to place those of a more general or comprehensive signification first, and those more limited afterwards; a transition to words of a distinct class is marked by a semicolon. Words are occasionally introduced which may seem too remote; but if it is borne in mind by the pupil that the words classed together are not to be considered as defining each other, no error will be occasioned by thus extending the classification.

This Part may be used, with great advantage, as the basis of exercises in which the pupil shall be required to discriminate carefully between the significations of words more or less nearly synonymous. These exercises may, of course, be much varied. They will be found admirably adapted to cultivate habits of accuracy in thought and expression.

\* This collection did not form a part of Butter's Expositor, but is derived from a work by William Carpenter.
